API Key Integration Guide for Middleware Services

Shopify:

Log in to Shopify Admin:

1. Go to your Shopify store's admin panel.

Create a Private App:

1. Navigate to **Apps** > **App and sales channel settings**.
2. Click **Develop Apps for Your Store** > **Create App**.

Generate API Keys:

1. In the app's settings, enable the required permissions (e.g., read/write products, orders, etc.).
2. Generate the **API Key** and **API Secret**.

Save the Keys:

1. Copy and save these keys securely for your middleware.

eBay:

Log in to eBay Developer Program:

1.
1. Register and log in to the **eBay Developer Portal**.
2.

Create an Application:

1. Create a new app under **My Apps**.
2. Get your **App ID**, **Dev ID**, and **Cert ID**.

Generate User Token:

1. Request an OAuth token via eBay's authentication flow.

Save the Credentials:

1. Use the App and User Tokens in your middleware.

Etsy:

Log in to Etsy Developer Portal:

1. Open the Etsy Developer Platform and create an account

Create an App:

1. Go to **Your Apps** > **Create a New App**.
2. Provide a name and description.

Generate API Keys:

1. Obtain the **API Key** and set permissions.

Use the Keys:

1. Save the keys for middleware integration.

Custom Websites

Contact Website Administrator:

1. Ensure the website has an API for integration.

Generate or Request API Keys:

1. Follow platform-specific steps for API access. For custom APIs, admins usually provide credentials.

Set Permissions:

1. Confirm the scope of access granted to your middleware.

Save the Keys:

1. Safeguard the provided credentials.
